BEFORE YOU START

This checklist isn't about being perfect.

It's about identifying small areas where you can improve your health, strengthen your finances, prepare for unexpected challenges, and create more options for your future.

Check every box that's already true.

Circle the ones you want to improve first.

Remember, progress comes from consistent small steps, not overnight change.

FINAL THOUGHT

Most people don't need a miracle.

Most people need a plan.

Improving your health, strengthening your finances, preparing for emergencies, and creating more options won't happen overnight.

But small actions, repeated consistently, can completely change the direction of your life over time.

Keep moving forward.

MEET THE BUILDER

Hi, I'm Stinson Wakuk.

I'm an Over-the-road truck driver, husband, and father of four.

Like many working people, I spent years believing that working more hours was the only way to improve my life. The road taught me otherwise. One unexpected expense, one health issue, or one missed paycheck can change everything.

Instead of searching for shortcuts, I started focusing on building stability one step at a time through better health, stronger financial habits, emergency preparedness, and creating future options while continuing to work full-time.

This workbook is based on that journey.

My hope is that it helps you build a little more stability for yourself and the people who depend on you.
